LINUX FUNDAMETALS

[Udemy course](#) (duration 71.5h)

Start: 21-09-2023

End: 21-09-2023

Requirements:

- PC/Laptop
  - CPU - (Inter Core i5) (AMD Ryzen 5) or higher
  - RAM - 8GB or higher
- [github.com](#) account
- [Visual Studio Code](#)
- GIT
  - [GitBash](#) - windows only
  - git - mac
- [Screenpresso](#) - used for making screenshots

Before starting course create public repository with name **linux-tuts** at [github.com](#).
Create folder on Desktop with the same name. Folder should have 3 subfolders.

- screenshots
- notes
- scripts

Create **[README.md](#)** file on each folder and write folder name in the file. For example screenshots folder should have [README.md](#) file and content of the file should be 'screenshots'. Push your changes to **linux-tuts** repository.

During the course if you see useful diagrams or screens do screenshot and put it in the **screenshots** folder. Make sure file name has clear defenition what screenshot it is and number of screenshot.

Example:

- 001 linux filesystem.png
- 002 ping cmd.png
- ...

Once you learned something new do the same in **notes** folder. Create new txt file, and put your knowledge there.

Example:

- 001 pwd command.txt
  - `Open terminal, write 'pwd' and it'll print name of current/working directory.`
- ...

During the course there can be tasks which requires bash/shell scripting. Put your scripts in **scripts** folder.
Example:

- 001_say_hi.sh

```bash
#!/bin/bash
echo "Hi"
```

At the end of every learning session push your changes to the repository.
